1. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

2. Claims 13-17 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-5 of prior U.S. Patent No. 6,186,197. This is a double patenting rejection.

The only difference between claims 13-17 and patent claims 1-5 is on lines 10-13 of claim 13 which call for the fluid to be "selected from the group consisting of a lubricant, a fluid dye....and combinations thereof" wherein patent claim 1 (see col. 6, lines 28-29) uses the wording "said fluid comprises a lubricant and a fluid dye". One of ordinary skill in the art would have understood either phrase to include various mixtures of lubricants and fluid dyes for refrigeration systems wherein there is on patentable distinction in the different wording.
